

Xello Parent Resources

Log in to Your Account ^

When your child's school or district has created a Xello Family account for you, you'll receive an email. The email will include a link to activate your account within 17 days of receiving it. All you'll need to do to get started is set a password.

Note: If you haven't received the activation email, it may have redirected to your spam folder. Make sure to remove "xello.world" from your email spam settings to receive this and future messages from Xello.

If you forget your password:

- 1 Visit <https://login.xello.world/> 
 - If your school uses Single Sign-On (SSO), you'll need to sign in through the SSO platform rather than the above link.
- 2 Click **Having trouble signing in?**
- 3 Enter your email address and click **Send Email**.
- 4 You'll receive an email to reset your Xello Family password.

Get Around Your Account

Your child will need the support of caring adults to achieve their dreams. One of the ways you can support their future is through Xello Family.

The dashboard is the first page you'll see when you log in. From here, you can manage your personal account, check out your child's work, and access the demo account.

The screenshot shows the Xello Family Dashboard. At the top left is the 'xello FAMILY' logo. In the top right corner, there is a notification bell icon with a red circle containing the number '1' and a green circle containing the initials 'DW'. Below the notification is a 'How Xello Works' link with a lightbulb icon. The main heading is 'Hey Derek' followed by the instruction 'Select a student to explore their future-readiness work in Xello.' Below this, there are two student selection cards. The first card, labeled with a red circle '2', shows a profile for 'Xavier Wright' (Grade 7 at Greenwood Middle School). The second card, labeled with a red circle '3', is for a 'Parent Demo Account' and includes a dropdown menu set to 'Grade 10 - Lincoln High School' and an 'Explore Xello' button. In the center of the dashboard is an illustration of three people (two adults and one child) standing around a large screen displaying various educational icons like a school building, a briefcase, and a graduation cap.

Xello Family Dashboard

1. **Manage your personal account**

Customize your personal account. Access your profile menu in the top right corner of any page. Upload a profile image, add a mobile number, or change the language.

2. **View your child's work**

Check out the work your child has completed. Click on their name to begin. If you have more than one child using Xello, they'll each have their own profile that you can review.

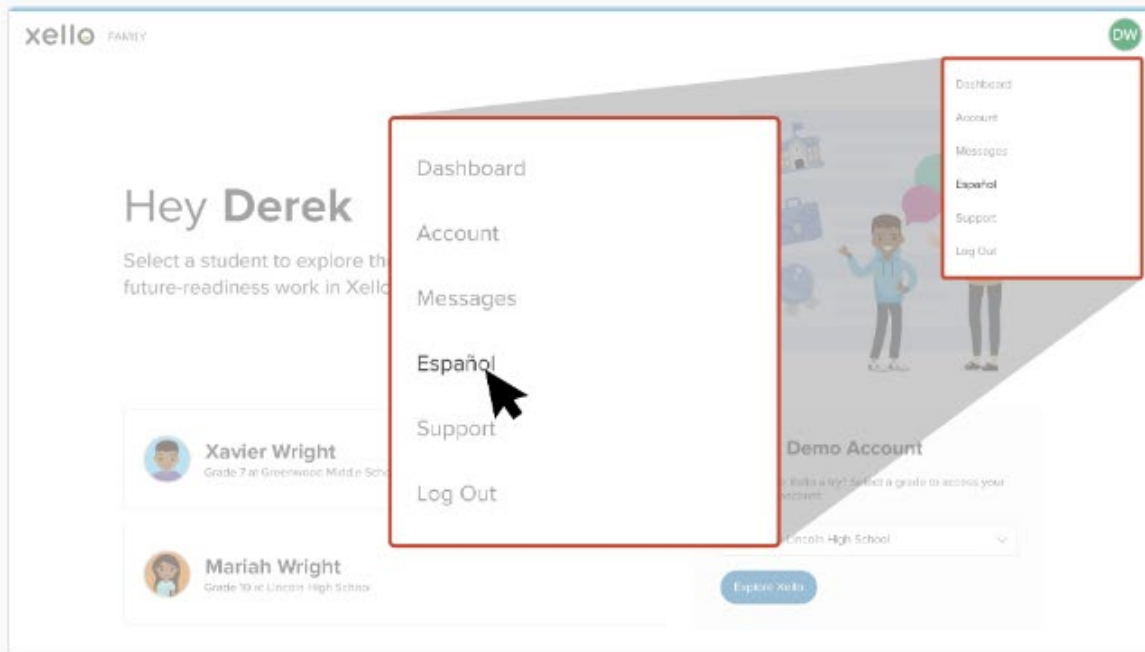

3. **Try Xello yourself**

Select a grade and start exploring. Use this opportunity to experience firsthand what your child is working on in school. Try a Lesson, complete an assessment, or explore careers!

Change the Language

Xello Family is available in English or Spanish. To change the language, click your profile menu in the top right corner of any page and select the language.

Using Xello at home

Your child was first introduced to Xello in school, but there's lots they can do outside of the classroom. Here are some ideas for how your child can use Xello at home:

- **Complete an interactive Lesson.** These are activities assigned to your child's grade level. Lessons help students build vital skills for persistence, resilience, and real-world success.
- **Complete an Assignment.** Your child's teacher may have created assignments for your child to work on.
- **Build their About Me page.** The About Me page helps your child to discover more about themselves. They define their interests, skills, and aspirations. Using this self-knowledge, they can explore the opportunities that are right for them.
- **Explore.** They learn about career possibilities and educational pathways. While reading through different career and school profiles, they save their favorites.
