Summer Acceleration

Important: Our teachers at Beachside DO NOT recommend taking a math/science course online as students who take math or science virtually usually do not have the necessary skills for the next level course at Beachside.

If you want to take summer classes to accelerate against the recommendation of BHS science and math teachers, you must do the following:

1. Fill out the course request change form before you leave for spring break. The form will open in February and is located here: https://www-bhs.stjohns.k12.fl.us/guidance/course-selections/
2. Request the course on FLVS or SJVS before you leave for spring break. Directions to request an SJVS/FLVS course can be found here: https://www-sjvs.stjohns.k12.fl.us/wp-content/uploads/2026/04/Virtual-Student-Registration-Guide.pdf
    a. The course will not be approved on FLVS until the course request change form has been filled out.
    b. The course will not be approved if requested after leaving for spring break.
3. Complete segment 1 and 2 of the course by July 23.
    a. If you are an incoming 9th grade student, you must log into your FLVS account and change the school of record to Beachside anytime between May 30 and July 23. If incoming 9th grade students do not change their school of record to Beachside, then we will not get their completed transcript from FLVS
4. The class will not be removed from the students' requests or schedule until they are 100% complete (by July 23). **If student does not complete the course by July 23, then they will be placed in the course at Beachside and will be required to drop their FLVS/SJVS course.**
